

1.

```
adb devices
adb install wiki_new.apk
adb shell pm list packages | findstr wiki
adb uninstall org.wikipedia
adb install wiki_new.apk
adb uninstall org.wikipedia
adb install wiki_org.apk
```

2.

```
adb shell monkey -p org.wikipedia 1
adb shell monkey -p org.wikipedia -c android.intent.category.LAUNCHER 1
(открывается другая страница в программе, интересно почему).
adb shell pm clear org.wikipedia
```

3.

```
adb exec-out screencap -p > screen.png
adb shell ls
adb shell ls sdcard
adb shell screencap -p /sdcard/screenshot.png
adb pull /sdcard/screenshot.png C:\Users\dkoveshnikov\Desktop\scrcpy-win64-v1.23
```

4.

```
adb shell screenrecord /sdcard/video.mp4
```

5.

```
adb shell ping -c5 -i 2 www.google.com
```

6.

Выполнить команду по одной:

```
adb -s $R58NB3TSVTB shell "svc wifi enable"
adb shell settings put secure location_mode 3
adb -s $R58NB3TSVTB shell "svc wifi disable"
```
